

Forex Binary Options Traders – Time to WIN! New Systems Launched

Hello Binary Trading Friends

Forex binary options are the most popular traded binary options.

Why? Well Forex trading is 24 hour – and so are most binary option

brokers accommodate making Forex binary options trading very flexible.

Look, regular forex trading has become a pain in the you know what.

With tens of thousands of programmers going to ‘university’ to learn how to program forex robots and global competition, much of

the edge, at least on the short term has been taken out of the markets. Well folks – we’ve taken that edge BACK in a BIG and BAD

Way.

Announcing my new binary options trading systems on Forex!

It’s time to finally beat the forex market and all of those nerd EA

programmers out there!

Remember – now in Forex day trading we only need to be right by 1

PIP, just 1 pip to to make up to 81% PER FRIGGEN HOUR!!

What’s 81%

in Forex day trading? That’s 81 pips you need to make day trading

Forex is it not??

Check it out: Just released; Forex Binary Options Systems:
KRAKEN, U7 AND OMNI11.....

STRIKER9 Pro – Last Copies. New Binary Systems On the Way

>> To Options Trading Authority and Daughter Publications <<

STRIKER9 Pro – Last Copies. New Binary Systems On the Way

Hello Binary Options Afficianados

We're wrapping up the month here
and were about to launch many new
binary options systems.

We've also have several programmers
trying to convert out binary
strategies into working signals.
We would like to get our light versions
of signals before we launch our Pro
versions because it's going to be full
time and expensive – the pro versions.
Hopefully you'll hear something soon.

We have a couple slots left for
STRIKER9 Pro before we need to
bring the price up to match the
rest of the systems. So if you
want to save \$1,000 then grab your

copy now.

We've refined and tweaked STRIKER9 Pro where average system profits have increased another crazy 54%. Yes! The net results over the past two months are now at \$37,850 per month for just one stock AAPL! Vs. a \$24,975 average on the two months prior.

And we've actually made STRIKER9 Pro even easier to trade in the process. It's pretty neat how it all worked out. Also we're including and Opportunity Extender Bonus Module for a limited time for more potential profit.

Because of the improvements to the system and the limited quantities left we don't really have a choice – we have to raise prices by 50%.

I am going to offer you the original price because you are my subscriber over the next 2 weeks. But there are only 8 copies I'm doing left.

I'm not doing more than this because my special offer which requires my personal involvement with my extremely tight schedule.

Today, for a limited number, I'm offering you the original price.

This system is rock solid and you will be able to verify the results.

The information in the system is highly proprietary and has many other applications. Therefore, I'm only looking for traders who are dead serious about trading well.

If you're in trading for the rush of trading I don't want you buying this product, or any of our systems. But if you are sick and tired of putzing around with the markets and are willing to do whatever it takes to do it right so you could actually trade for a potentially very good living (there's no better lifestyle folks!) then I will personally help you over a skype / team viewer session to MAKE SURE you've got this system down and can trade it well.

Customer feedback: "...But I am even MORE grateful and THANKFUL for the session yesterday. Chris was really good at showing me exactly how to work the system. Now I know what I'm doing. " DP in Cali

August RESULTS STRIKER9 PRO XF Integration with New Extender Module:

SYSTEM NET PROFIT: \$41,900.00

\$2,095.00 Per Day \$500 Per Trade

\$419.00Per Day \$100 Per Trade

\$4,190.00Per Day \$1,000 Per Trade

JULY RESULTS STRIKER9 PRO XF Integration with New Extender Module:

SYSTEM NET PROFIT: \$33,850.00n \$500 Position Sizes Per Month

\$67,700.000n \$1,000 Position Sizes Per Month

\$1,611.90Per Day \$500 Per Trade

\$322.38 Per Day \$100 Per Trade

\$3,223.81 Per Day \$1,000 Per Trade

Monthly Average System Results: Was: \$24,975 Now: \$33,575 !

(new figures reflect new system tweaks)

Historical System Results Over More Instruments and Accounts:
Trade 2 Accounts on Just AAPL = Was: \$49,950 ~ Now \$67,150
Per month

Trade 3 Accounts on Just AAPL = Was: ~\$74,925 ~ Now \$100,725
Per month

Trading 2 Accounts with AAPL and GOOG = ~
Was: \$99,900/mo ~ Now \$134,300

Trade 3 Accounts with AAPL and GOOG = ~
Was: \$149,850/mo ~ Now \$201,450

**Wanna Be, Wanna be Like Eddie
– STRIKER9 Pro Student Gets**

it and Goes 10W and Zero Losses

Wanna Be, Wanna be Like Eddie – STRIKER9 Pro Student Gets it and Goes 10W and Zero Losses

Hey guys I wanted to show you a quick real trading proof from a student of ours named Eddie SR. The guy is now set on the path to potential long term trading success after having purchased our STRIKER9 Pro system. We're extremely proud of him and feel like he could become a 'player' down the road – someone who can pull in ridiculous numbers on a daily basis – one of those.

Yet, it didn't start that way first. Eddie was missing a couple key ingredients after he obtained the course and had gone through it. Well, we worked with him, corrected a couple of things (and even made some extra videos for this course to help more easily understand this powerful trading system.

Finally it clicked for Eddie. He sent us his daily results just to check with us. Finally Eddie made a breakthrough. And he started winning! Actually it was more like cleaning house! – with STRIKER9 Pro.

Check out how Eddie blasts 10 Winners in a row – 10 wins and Zero losses for the day on Oct 6.

<http://www.binaryoptionssystem.com/eddiesr-real.jpg>

I wanted to tell you about Eddie and also give you a heads up.

Shortly we'll be launching about 7 new binary options systems designed specifically for index options, Forex options and gold options.

After we launch those we'll be forced to raise the price of STRIKER9 pro up \$1,000 more (there are still some left from last offer).

So if you want to join the ridiculousness on a trading system that should not even exist, or at least be offered publically get it while you can!

This system is rock solid and you will be able to verify the results.

The information in the system is highly proprietary and has many other applications. Therefore, I'm only looking for traders who are dead serious about trading well.

If you're in trading for the rush of trading or are desperate for money

I don't want you buying this product, or any of our systems.

But if you are sick

and tired of putzing around with the markets and are willing to do

whatever it takes to do it right so you could actually trade for a

potentially very good living (there's no better lifestyle folks!)

then I will personally help you over a skype / team viewer session

to MAKE SURE you've got this system down and can trade it well.

Customer feedback: "...But I am even MORE grateful and THANKFUL for the session

yesterday. Chris was really good at showing me exactly how to work

the system. Now I know what I'm doing. " DP in Cali

Binary Stock Options for Beginners

Binary Stock Options for Beginners

When you are just starting out in the trading industry with binary stock options it can be a bit difficult and you may not be quite sure what to do. You've likely heard about people 'making it big' with option trading and you are wondering how you might go about doing the same. It's definitely a good question and luckily binary stock options can be a good choice for beginners.

The thing that makes the binary stock options so well suited to beginners is simply that they only provide two outcomes. In binary you can only have two outcomes or numbers, and these are 0 or 1. Not Unlike in a binary system, there are not multiple outcomes depending on the way the numbers are laid

out however. When it comes to binary stock options everything is based upon a wager that you will make.

The wager of course is how well that particular option will do when the market closes. Once you make your wager you will buy the contract and keep an eye on that particular option. If it closes at the amount you predicted or at least close to it, then you will receive your payout. If you fail however, you will only receive a small percentage of your money back.

There are plenty of binary stock options related websites that work like the traditional broker websites in that they will permit an individual to browse various options and make purchases. You need to make sure you have the money in your account to cover the purchase and if you succeed you will make a profit. It's really as simple as that and many beginners use this as a tool to help them get started on the forex or option trading market.

Any market is bound to be complicated when one is first starting, and when it comes to option trading there are actually a number of experts that report difficulties every single year. With binary options you will have the ability to make money, and while you may not become rich by doing so, you can at least have a decent revenue stream coming in for the foreseeable future.

If you are to succeed with this however, you will need to do quite a bit of research. Knowing the different options will help you greatly as you will have a basic idea of what you wish to invest in and which investments will turn out favorably. Something to remember is that nothing is for sure. You could make the best investments and follow the advice of experts and still lose! If you're going to try your hand at the market, especially with binary stock options, you have to be prepared to lose at some point, but if you keep at it, you'll stand to make a lot of money.

Binary Stock Options for Beginners

Profiting from Binary Index Options

Profiting from Binary Index Options

The stock exchange is without a doubt something that many people will try today and in the next ten years. Nearly everyone in the United States currently has a stock or trading account and they plan to use it for their retirement or even the proverbial rainy day fund. In any case you need to know that you have options (no pun intended) when it comes to trading on the market.

What we are going to talk about today are binary index options. The first thing we need to talk about is the concept of an index option. This is very much like a standard option. There are a number of benefits related to binary index options, and the biggest advantage is that you don't need to worry about watching a position after you entered – because you can't exit.

When you are buying binary index options it will be a bit different however. If you are buying standard options you will need to pay close attention to the market trends and often times you will fail in your endeavors. With binary options it becomes a bit more easy. You might try using binary index

options if you are new to the trading scene.

Because there are only two possible outcomes in the area of binary options it is pretty clear that you have a high chance of making a profit. When you buy a binary index option you will likely spend about \$100 on it and you will wager that it closes at a specific price at the end of the hour or when the options expire. If you are correct then you will receive the payout you want, but if you are incorrect you will receive a small sum of money that is nowhere near what you invested.

Some will see this as a form of gambling and others will see it as a business opportunity. The most important thing is that you do not turn it into a form of gambling and that you remain perfectly professional. The more professional you are, the more profit you will see from the various binary index options that you choose to utilize.

Profiting from Binary Index Options

Options Day Trading

Options Day Trading

Options Day trading is a rather popular occupation these days for a number of reasons. For one thing it allows people to work from home which is already a very attractive prospect. Another interesting thing is that unlike many other jobs, day trading can actually lead to financial independence. Anyone who is in the work force knows exactly how appealing the concept of financial independence actually is and chances are

that you are no different.

There are many things to trade, options being one of them, and options can be bought or sold in bulk. The smallest trading unit that you can buy in the options scene is a single unit, and you can buy virtually any amount you wish. When you are purchasing your options you need to understand that they will have an expiration date and you will need to sell them within that time period. Remember that there are two different actions that can be taken when it comes to options day trading and these are calls and puts. A call gives one the right to buy an option within a certain time period and a put enables the individual to sell.

There are binary options that you might consider as well when you are purchasing any types of stock, options, or even currency. Binary options are a bit different due to the fact that they are much simpler and only provide two outcomes. These outcomes are simply win or lose which makes them easier to work with than your standard options. And plus it's great for day trading options, or day trading in general because you don't need to worry about the exits – only the entries! This makes day trading MUCH easier!!

By purchasing these binary options you will bypass the complexities which are normally associated with the use of the trading market. Many people tend to use this as a crutch until they learn to fully utilize the options market. Something interesting about the market is that it has been tailored so that nearly everyone can use it if they find the right tools.

The market has been around for some time and being able to follow the trends it set forth was a bit difficult because there was no software. The market in that time relied on the minds of men, and some might even say that those minds have dulled over the years as a result of computer programs and robots. Robots are not allowed by many stock brokers but you can always use a newsletter and read the market trend

predictions.

Finding the right options and utilizing the right strategy is very important when it comes to any type of trading. That being said now would be a good time to start researching the different trading options that you have. Options day trading is a great career to get into so long as you can master it! So that's why you need to buy our binary options courses and binary options systems. See the links above!

Options Day Trading

The Concept of Binary Options Trading

The Concept of Binary Options Trading

Binary options trading has been around since about 2008 and shows no sign of slowing down. The question you might have at this point will probably pertain to the nature of binary options trading and why it is so popular.

For someone who is not familiar with the forex or Foreign Exchange (Foreign Currency), it is probably not apparent that the forex is extremely complicated. The binary options market has used the "Forex Experience" as a spring board to launch it's own new, unique twist on trading.

Originally the market was only available to bankers and other

individuals in the financial industry. It may have been possible for other individuals to become involved, but as we have said before the market is extremely complex and in order to comprehend it properly one has to undergo a series of courses and ultimately gain a complex understanding of the concept. In the past this was only available to certain individuals and perhaps a few prodigies who managed to catch on.

With the advent of the internet things became a bit different. The exclusive nature of the foreign exchange suddenly dissolved and more people were able to get in on it. The internet educated people, showed them the right path, and eventually the very act of trading became available over the internet

One of the original online trading companies was Ameritrade and it is still in use today. Despite the ease of option trading in the modern day there are still ways that it can become simpler. One of the simplest forms of option trading is binary options trading. These are simple because they can only have two outcomes and you only stand to lose what you put into it.

The way it works is actually pretty simple. What you would do is pick an option and make a wager on how it is going to turn out, or in other words what price the market will actually close at. Once you determine this you will buy the option or place your wager and if the market closes at the price you predicted then you will make a profit. If the option does not close at the price you predicted then you will not make a profit, though some of your money will ultimately be refunded.

Today there are plenty of websites dedicated to binary options trading. If you do a simple internet search you will undoubtedly find that there are several websites that allow you to make an account and do your basic binary options trading. One thing to note about this type of option is that

you will need to have funds in your account immediately in order to buy your options. Other than that it is precisely like other types of option trading except for the simplistic nature. If you are just starting out in the world of forex and other types of trading, binary options trading may very well be a better choice.

The Concept of Binary Options Trading
