

# **NEW Binary Options System LAUNCHES – Binary Options Insanity**

## **” NEW Binary Options System LAUNCHES – Binary Options Insanity”**

Binary Options Insanity launches!

A little cracked secret code popped out of while discussing an unrelated

system with a colleague, unrelated to binary systems that is... that opened the window of thought to the Binary Options Insanity concept based off of “Stupid Simple Systems Philosophy” (a newer trading system development philosophy vs. the “Trading for a Good Living Philosophy”)

As soon as I visualized the concept ran in and BAM ! i averaged

\$1800 a day 5 days in a row of testing (That was insane! Especially for only \$500 a trade)so I pursued the strategy further.

The system is intense. It is designed for trading binary options

on AAPL and we have not tested on other instruments. You can see

the track record on this page:

<http://binaryoptionsinsanity.com>

You can trade all day or you can simply trade sections of the

day, get good at those sections and money manage those sections up to potential sizable gains.

Check out the track record too!

## **OMNI11 Is Obliterating EURUSD – Track Record Updated**

## **OMNI11 Is Obliterating EURUSD – Track Record Updated**

OMNI11 Is Killing It on the EURUSD. We even surprised ourselves how strong and consistent this system has been. It's just always good to see our creations continue to blossom.

Yes, on that note just to let you know – this is a totally proprietary system.

In my 20 years of trading systems study no one has invented the concept in this system that I have. It is extremely powerful

and solid, solid for long term trading (the markets simply can not deviate from these price rules...)

OMNI11 is our PRO Binary Options system for trading Forex, particularly the EURUSD. It has been doing very well.

If you are considering a rock solid binary options system and want to go full time pro then due some diligence, read the page, ask us your questions and hit it! Get it. Attack it. Learn it FAST and implement FAST so you ABSORB the system and get it 'in your system' so you 'own it'. Practice will increase your believe in the system minute by minute.

We've gotten a lot of good feed back from customers on this system. Some of them were shocked that something actually worked and even more surprised that something actually worked in Forex! (i guess after all of those 'robots' they went through)

So you can feel better about buying the system.

Anyways money can go fast trading when you don't know what you are doing. Why not 'flip the table', 'get on the right side of the tracks' and start to trade in a winning way that has stood the test of time? Invest in the system instead of 'investing' your funds in the markets with nothing to show for...
