---

“Kill It” in Binary Options Trading in just 4 Hours a Day. Very Tradeable and is quite fun to trade, if not addictive. Now isn't that great? Trade a trading system that is addictively fun, that makes you want to trade and that has actually worked to INSANE levels of profitability?

- Trades 30 minute binaries
- Trades only 4 hours from 8 to 12 eastern (-4 to -5 gmt). Well, you can trade any active time period and we just selected 8 to 12 for demonstration.
- Yes you can trade from 12 to 16:00 as well
- Yes and you can trade the EURO session as well. So you can trade this system from anywhere in the world at a doable time frame.
- Very easy to trade
- No indicators or drawings needed
- Trades Gold Spot as binary brokers currently support “XAU” “XAU A0-FX” (esignal), XAU/USD Metatrader similar to GC.
- Learning curve: 2 hours. Then you need to practice in real time with tiny (i.e. \$10) positions until you get the hang of it, which should be quickly. It's hard to screw up!

Performance Examples Based on \$500 per trade. 70% winning payout. 10% Back on Loss.

Trade Gold spot XAUUSD or XAUEUR or GC – what binary brokers take.

What if you could make this happen:

- – A \$3,925.95/ Day systems results Based on \$500 Per Trade for a full time 8 hour work day 5 days a week. Now what if you could graduate to \$1,000 a trade then to \$2,500 a trade? Well let's see \$500 to \$2,500 is \$3,925.95/ Day systems results to \$19,629.75/ Day systems results! Hey just doing the math.
- Trading 8 to 12 brings a \$2,180.95 a day systems result based on \$500 per trade
- Trading 12 to 4 brings a \$1,745.00 a day systems result based on \$500 per trade
- Even if you're loaded just start small, get used to trading the system and build to there.
- What if you could make a quarter of that happen clicking call and put buttons all day like a video gamer? Maybe you can maybe you just won't do it. I don't know.
- Our philosophy is that when we have a system that has performed consistently over time as MMX has we need to hit it and hit it hard! We have to be aggressive and at least try. You have to make it happen, make yourself put it to work.

- If traders would get their minds off trying so desperately hard to make money from trading and instead, focus on trading excellently for the sake of trading excellently they could have more success.
- Or... try turning trading into a game. Get into the mindset of trading a SYSTEM as a game. Pretend you are playing video game as you are trading a system . Doing so could help you actually trade a system better by playing by the “rules of the game” better (vs. breaking rules and trading too big in desperation for money). Every game has rules and we are all quite well condition to play by the rules when it comes to playing a game. (This is a big mindset tip I just gave you. I hope you can implement it. Email us your experience on the “Game” mindset if you do.)

**Performance Summary From 8 to 4 PM Eastern – both sessions combined – an 8 Hour “Work Day”**

Combined Daily Average:	<b>\$19,629.75 / Day Based on \$500 Per Trade</b>
Monthly Average:	<b>\$412,225.00 / Month</b>
Annualized Average:	<b>\$4,946,700.00 / Year</b>

Systems price for purchase today is: \$3,777. Those of you who smartly apply the SYSTEM in a professional way will realize quickly that buying MMX and treating it as a business was possibly one of the best business decisions they've ever made.

How is that?

Once you get the system you'll see how it's based on principles tied into the human psyche, and humans at the core, the instinctual reactionary level, don't change. This gives us a huge edge for our binary trading. So all we have to do is what? The same dang thing over and over is what! We keep executing MMX and watch how systems trading "magically" works.

Those of you who've have not been brought up in business or have run a successful business or have worked for a successful business tend to miss how success in business (or really anything for that matter that is not spoon fed) works. Unfortunately, the "entitlement" mentality that many have picked up from others or have been brainwashed with by employers trying to lure us into working for them has left its mark. In order to succeed in business you have to have a little faith and trust. Huh?

Faith and trust that is needed for successful business is also needed in systems trading. You need to eventually trust a system to net out and do it's job. Otherwise you'll start fooling around with the system, messing it up, second guessing and THEN get hooked by the nose by the market place through your emotions to do it's bidding. And the marketplaces

bidding for you is for you to give the marketplace all your money as fast as you can! We say NO to that.

Fortunately for you MMX is a fast learn. You can start trading pretty much immediately. That said, don't. Not yet. Study it historically. Make up your own track records. You need to BELIEVE that the system can WORK. THEN start demo trading. And then move to tiny amount trading. Then you're ready. And if you can simply stick to a system then maybe you could have similar results as our track records and into your trading account!
