## NADEX PUNNKD 20 Minute Binary Options Scalping System

**Oh Yeah PUNNKD Is Big and Bad... Poor NADEX or rather Poor NADEX Competition...**

From a prior post on this [NADEX Scalping System](#):

*12/14 /16 wlwlwwwwwwwwlwwww that's 9:40 to 12. wwwwwwwlwwww so that's 14 to 1600. On this faster day most went from roughly 20 to 30 range to 90 and many went to expiration on a SCALPING method: 26 W and 4 loses*

*Yikes. How much should we sell this for – or should we even sell it?*

*If your average trade on this day made say \$500 (risking \$200*

*to \$300/trade) that's \$11,000 bucks for a days work and for a tiny position size.*

*So if you were risking \$1000 to \$1500 per trade what would the profit be... \$55,000 for a 4 hour job of fun?*

I mean talk about money on demand, like really. This is one of the closest things. Hmm maybe I shouldn't be selling this one... Whatever. I'll pull it when I feel like it. So you know my stuff is good. And PUNNKD is great. I would get it if I were you. Buy it here: (no coupons)

It's \$3k. Get it before it's \$10k.
