

Need Your Desired Ideal Binary Options Systems Vanillas and FX Feedback

Need Your Desired Ideal Binary Options Systems Vanillas and FX Feedback

Hey fellow superstar traders current and to become:

We're in heavy product development mode here. I figured I'd send a shout out and see if there are any types of ideal systems you'd want to see designed to meet a desired end result or experience you want.

This is for Binary Options but, well, let's make this for vanilla options and FX too.

i.e. Some ideas:

- More set and forget style systems
- More quick pop systems?
- More Mny On Demand "MOD" Philosophy systems
- More NADEX systems? What types Scalps? What expirations? What end result do you want? ITM, ATM or OTM NADEX binaries?
- Day bar trading?
- Micro swing trading?
- Day trading (assumed in binaries but for vanillas and FX)
- And whatever pops into the mind

Let me know! You never know – it's very possible that we could make it happen.

To send us feedback just go to our contact form
Thanks!
