Performance sample

You can see from the results below that the Venom1.3 Binary Option System has been a very solid producer with extremely high winning percentage. The system is a more laid-back type. We trade the 5-minute bars. And the track record below represents a 15 minute binary options expiration that means we time 15 minutes from the point of entry to the expiration.

This and can also be modified and tweaked in order to fit the NADEX 20 minute binary option and or the 10 minute binary option or 5 minute binary option. And on that note you could also use this system as a momentum trader on the NADEX 2 hour binary option. The principle of this trading system is

extremely solid so please do understand it is quite flexible. And if you need help on such a tweak just contact us after you have purchased the system.
