SPREADS TRADING STRATEGY & SYSTEM

Introducing – the SN00K-5
NADEX “Spreads Cash Machine”
Strategy & System for Trading
NADEX Spreads and Knockouts
for Potential Stable and
Powerful Cash Flow.

SN00K-5 NADEX Spreads Trading Strategy & System

is a new way to trade the markets on a daytrading basis with NADEX that not many people are very familiar with.

A lot of people are familiar with NADEX binary options but the NADEX spreads concept has kind of past a lot of people by. Well there are certain advantages of spreads trading at NADEX that are better than binary options trading there – how so?

Well with spreads trading you get whatever price action achievement that you achieved. Whereas with binary options if you are out of the money and you made some gains in the underlying asset but not enough gains to get in the money then you lose all your investment in that position by expiration.

Well let's just say you made a few points in the spread. If so you would get that as profit at expiration. So with spreads trading you are not blanked out like binary options trading and it is purely momentum trading.

Plus with spreads trading you can really leverage trading big momentum moves, intraday trends, that happen intraday, even over several days which you can play with weekly spreads or knockouts. I mean ultimately what if you set a goal for say like making \$100,000 a day from **NADEX** spreads trading? With a good consistent systematic approach, that possibility has good probability. Learn **NADEX** spreads!

Also with spreads trading you can really more tightly control risk.

Also with the nature of **NADEX** spreads, you have the ability to load up with a more concentrated position, for the purpose of going in for a bigger cash grab, home run or high velocity lesser run with a more concentrated position score. So as you learn different **NADEX** spreads strategies and systems, as you would with **SNOOK-5 NADEX Spreads Trading Strategy & System**, you'll have a specific and simple way of

entering and exiting the **NADEX** spread in order to generate cash flow profits. Once you become consistent then you can potentially start stacking up profits thereby compounding them over time which can then become extremely profitable.

Check out the performance results below based on the system entries and exits. So we're riding momentum. We're riding momentum in daytrading and we're cashing out when we make our score. **SN00K-5 NADEX Spreads Trading Strategy & System** teaches you the exact entry and exits methods. And actually this system is arguably pretty easy to trade. So could looking for a simple system then you'll want to learn this one.

Net profit based on 10 contracts. if you trade 100 contracts than now the under \$160,500 profit in just seven days. Would that be a sweet weekly paycheck?!

| SN00K5 | Spreads Trading | | |
|--------|-----------------|-----|--|
| W | L | NET | |
| 6 | 1 | | |
| 5 | 1 | | |
| 3 | 2 | | |
| 1 | 0 | | |
| 4 | 2 | | |
| 5 | 2 | | |
| 5 | 1 | | |

| | | | |
|---|---|---|----------------------|
| <p>29 wins total – (as in we capture profit from momentum trading.)</p> | <p>9 losses total (as in stopped out since we are momentum trading)</p> | <p>Net profit based on 10 contracts. if you trade 100 contracts than now the under \$160,500 profit in just seven days. Would that be a sweet weekly paycheck?!</p> | |
| <p>\$17,400.00</p> | <p>\$ 1,350.00</p> | <p>\$16,050.00</p> | <p>7 DAYS</p> |

Daily Average is \$ 2,292.86 in profits in this systems performance example. – The daily average means that on 10 contracts if you traded with the systems results above by following the system then this would have been your net profit on average for the systems results.
