

# How to Use NADEX

## How to use NADEX and Actually Start Trading for a Living a Potential Good Living?

**We have courses and memberships that will teach you how to trade at NADEX in a professional way to help you speed up that process.**

Ultimately it is pretty simple. The fastest way to learn is to get a demo account at NADEX and just simply start hacking away putting on all sorts of Trades but then actually follow those trades to see cause and effect – that's how you learn the fastest. And if you don't do that you'll have doubts and wonders in the back of your mind which will waste time.

The nice about NADEX is that they have an order window that will tell you your exact risk and your exact reward per contract as you place.

And the thing is also that is nice at NADEX is that if you make a mistake you can get out of your trade so it's not like traditional binary options.

With NADEX you could trade momentum with binary options and get out early to take your profit.

Also with NADEX you can trade what they call spreads which is kind of like trading Forex or Futures but without the margin requirement plus it's much easier to get started because you can just start with a couple hundred bucks on your credit card. Plus there are no commissions which are

really annoying when your day trading futures, eminis, Forex, stocks etc.

You can trade at the money ATM, in the money ITM or out of the money OTM. If you trade out of the money you can get very large returns on repeated basis even 1000 % Returns on a repeated basis, no joke. You just need to know when to enter a position according to the price chart which we can teach you in one of our systems or through our memberships.

You can trade at the money ATM which you are probably already used to if you know binary options which means that you just need the underlying asset to move just a tiny bit to give you pretty much a 100% profit. Oh yeah and at the money at NADEX is roughly 100% versus the old-school binaries which paid out only 70 to 80%.

With In the money trading ITM you are simply looking to capture premium which can rapidly Decay into your account as profit. There are many sweet spot premium selling opportunities in NADEX but of course you'll still want to coordinate your in-the-money premium selling with a price chart strategy or system.

Now if you're from the regular options, vanilla options, stock options World being in the money with a sold short options position is a bad thing if you're looking to collect a premium. But at NADEX it's a good thing and even a better thing. Because all you need to do is be in the money just a slight amount and then NADEX will start dripping profits into your account even if the underlying asset is going nowhere and if you have shorter time left you'll see that profit drain into your account very quickly especially if you are trading the NADEX 5 minutes options were the NADEX20 minute binary options or even the NADEX one hour to hour binary options.

Well we could go on and on but it's actually pretty simple

to trade NADEX assuming you want to actually make money from NADEX. So here are some actions steps:

1. Join our newsletter and start learning what to do. See NADEX 101

2. Get a NADEX account and get the demo account and start putting on all sorts of positions while watching What Happens. Don't forget to watch what happens and study the emails they send you to compare entry and expiration of position, or early exit if you get out before expiration

3. Understand you can trade NADEX as a supercharged way of trading binary options simply targeting expiration.

4 Understand you can trade NADEX for momentum sake to make a lot of cash from swing Trading, micro swing Trading, intraday swing Trading
