

Like NADEX 20 Expiration? Cool New Program & Check out the NEW Vinger II Strategy – a Big Winner

All right we have an awesome new program simply called NADEX 20 Minute Expiration MASTERS Program which allows us the freedom to launch most excellent strategy after strategy on a monthly basis getting you new breakthroughs in Treasure Chest strategies to you versus just sitting on our desktop getting bogged down by all this website work mumbo jumbo.

And technically that has been the delay in getting you a ton and systems of breakthrough strategies over shoot the years. But now we can get them to you quickly and this new monthly membership program model and it will save you a ton of money too.

We likely will let certain strategies slip out that we probably would have never put out there because they're so powerful we didn't want you guys wrecking NADEX lol. We are making new breakthroughs these days that are incredible and they come at flash of inspiration moment and this membership allows us to quickly put them into your content whereas we may think twice if we had to do all that website work to launch the strategy on it's own.

(and wrecking brokers was a real issue we had to deal with with the old binary brokers believe it or not where we couldn't put out certain systems because they were too powerful thereby potentially wrecking the industry at the time.) At least one of the last broker drama stories I heard was that one of our students who was Trading our KOR5.2 system ramped his account of the 500K and then the broker just said to him "sorry we can't handle you" but actually paid him out the 500k which was quite honorable, surprisingly. Other brokers, those Cypress brokers.. weren't so honorable according to stories. NADEX is a USA change so the probability of problems is extremely low.

But anyways we just made this new most excellent strategy called VingerII and as we were walking through in the course it wins like almost every single time. We couldn't even find a loss on the trading days we were presenting in real time. It's available right now in your membership in addition to other super important education for the next 20 minutes expirations on how to play them well.

The membership is only like \$97 at this point in time and can provide huge returns in terms of the education and strategies you will be learning plus the education on how to become a Master Trader to virtuoso levels. Yes that's right virtuoso is the goal, for real and we are going to use the super strategy trainer approach to get you there. So get on track and stay on the tracks I bet we'll be able to make you into a great trader from the inner game to the outer game.
