NADEX 20 Minute Binary Option Scalping Strategy

NEW NADEX PUNNKD 20 Minute Binary Options Scalping System is Ridiculous!

Yeaaaaahh I messed up. I was trying to make this "light" level system and oops I did it again...

Look at this ridiculousness!

Yes see the logo says strategy but it ended up turning into an awesome system again! Ahgggrr why can't i make a lame system any more!

Check this out:

12/14 /16 wlwlwwwwwwwwlwww that's 9:40 to 12.

wwwwwwlwww so that's 14 to 1600. On this faster day most went from roughly 20 to 30 range to 90 and many went to expiration on a SCALPING method: 26 W and 4 loses

Yikes. How much should we sell this for – or should we even sell it?

If your average trade on this day made say \$500 (risking \$200 to \$300/trade) that's \$11,000 bucks for a days work and for a tiny position size.

So if you were risking \$1000 to \$1500 per trade what would the profit be... \$55,000 for a 4 hour job of fun?

That's a pretty good daily paycheck if you ask me.

Contact if interested.

Actually [if you want to buy it you can buy it here.](#)
