

# **V00PS Trading System & Strategy for NADEX 2 Hour / 1 Hour Binary Options Expiration**

**V00PS Binary Options  
Continuous Cash Flow System  
And / Or Trading Strategy for  
the NADEX 2 Hour Binary.**

**V00PS Can Be Run as a Trading  
System that Can Provide Continuous**

# **Cash Flow Opportunity As You Can See From The Performance Sample Below. Or it Can Be Used as a Strategy for Optimized Entry.**

Trading V00PS as a strategy means is that V00PS can be optimized so you can pick and choose the best trades whenever you want and enter whenever you want. When you trade V00PS, since its such a high probability opportunity, you can trade as a strategy. This means that you can trade whenever you want while finding optimal opportunities with V00PS.

V00PS can also be run as a cash machine type of system as well where you take all the trades in a row. V00PS is very solid this way.

**What's the likelihood of you being able to actually profit and trade for a living off this system?**

Very good. It has a very solid approach that we've used for a long time now with other systems outside of binaries and you know we've been developing systems and strategies for binary options for now over 10 years in binary options, with over 23 years total, for all formal systems and strategies development.

This is a binary options strategy and it's a system that you can trade day and night that can put you in position for powerful cash flow generation. Trade it whenever you want. Best results usually occur by trading a consistent period of time on a daily basis, even if you just trade 1 hour a day.

You see, we found this loophole like method in price action that has been solid for a very long time. It's a genuine "loophole" type of price action tendency that's ultra consistent and responsive. It's actually surprising how solid it is and how we can exploit this price action scenario to trade these 1-hour binaries into the money over and over for winning trades. I found that VOOPS works well with the one hour binary expiration which is the NADEX 2 hour binary expiration with the 1 hour overlap.

As you can see from the example below VOOPS NADEX 2 HOUR 1 HOUR STRATEGY is focused on Forex but you can use this strategy or system to trade any other instruments in a similar way.

Just imagine being able to trade 4 to 5 hours a day with the potential to have results like you see below. As you can see from our Forex example we have excellent performance examples from the European session and the USA session and free USA session in the morning. This means that VOOPS NADEX 2 HOUR 1 HOUR STRATEGY provides you opportunity potentially make a good living wherever you are in the world.

## **VOOPS NADEX 2 Hour 1 Hour Systems Run as a System Taking All the Trades Performance Sample**

Trades 1 hour NADEX binaries ATM. The trading engagement is pretty laid back and you should be able to work on other things while waiting on your very clear trade setup.

VOOPS is a strategy and system. Its system that you can run as a cash flow machine type of system. What does that mean? This means that you can just simply do the trades over and over and let the results net out.

I can't promise you future returns as you know, but that's the style of the system. But also, you can optimize the trades meaning that you can look for certain trades that we

teach you in the course, that line up well in coordination with other factors that give you a higher probability position for winning.

Now, a lot of people don't like getting that involved in their trades, and they just want to simply see the trade they need to do and execute it. Other people don't like that type of more plain approach, they like to get engaged, they'd like to pick the best trades and, and then go from there. So there are two different types of traders and that's okay. It's just personality dependent.

And remember that these are binary options and we are trading ATM binary options. So all you need to do is enter correctly. And that's it! You don't need to watch the position from there as you do with other forms of day trading.

And so what you can do is that you can use this very solid strategy called VOOPS that we've had this type of approach over time and it's a very solid approach. And it works well not only here with binary options, but also with swing trading and vanilla options, etc, etc. So when you learn the VOOPS NADEX one hour strategy and system, you will be able to gain a skill that you can use on other forms of trading.

Remember, all that counts for success in trading, is that you have a way of trading that is stable that you can depend upon, and that you can just simply do over and over to net out a profit.

Because when you can consistently net out a profit, guess what? Well, all you need to do is increase your position size as your account size grows, and then you start making a lot of money as your account grows through the compounding bringing about geometric growth speed to your account. And then well, you can imagine, over time, what can happen...

Now, and these days, a lot of people are in the markets because of excitement. They just think it sounds neat and exciting. But a lot of people also don't realize that if you want to make money in trading consistently, you're gonna have to show up and actually do the trades. You're gonna have to watch the markets, you're going to have to do a little ongoing work. And so that's what trading is about.

If you don't want to be a day trader, you can do swing trading. If you want to do swing trading then you can look at our weekly options systems or you can even use this strategy, this system for swing trading day bars, or swing trading the weekly binaries, or even the new NADEX Knockouts.

So these are other angles that you can look at. Ultimately, if you define exactly what you want, then once you have clarity, then you can then take action.

And V00PS system and strategy is a vehicle for you to approach the markets in a solid way. We've done the figuring out for you. All you need to do is get V00PS and put it to work. You just need to log into your computer, learn this system practice it some, and then get it rolling it rolling on a demo account and then with real money.

So if you're looking for a way to create a side income, or trade full time and replace your job, then V00PS is a good system and strategy for you to learn.
